## 2.2 Label elements

## Labeling (REGULATION (EC) No 1272/2008)

Revision Date 11/16/2015

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

## 2.3 Other hazards

If small particles are generated during further processing, handling or by other means, may form combustible dust concentrations in air.

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB).

## 3. Composition/information on ingredients

#### 3.2 Mixtures

Contains: Additives and stabilizers

## 4. First aid measures

#### 4.1 Description of first-aid measures

| General advice          | : Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid.   |
|-------------------------|--|
| If inhaled              | <ul> <li>Remove person to fresh air. If signs/symptoms continue, get medical attention.</li> <li>In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air.</li> <li>Obtain medical attention.</li> <li>Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR)</li> </ul> |
| In case of skin contact | <ul> <li>If molten material contacts the skin, immediately flush with<br/>large amounts of water to cool the affected tissue and<br/>polymer.</li> <li>Do not attempt to peel polymer from skin as this will remove<br/>the skin.</li> <li>Obtain immediate emergency medical attention if burn is deep</li> </ul>   |

## 8. Exposure controls/personal protection

#### 8.1 Control parameters

#### Ingredients with workplace control parameters

#### **Occupational Exposure Limits**

| Ingredients   | CAS-No. | Туре | Limit Value           | Basis<br>Revision Date | Additional<br>Information |
|---|---------|------|-----------------------|------------------------|---------------------------|
| Materials that can<br>be formed when<br>handling this<br>product: Non-<br>specified (inert or<br>nuisance) dust |         | TWA  | 10 mg/m3<br>inhalable | US (ACGIH)<br>2005     |                           |
| Materials that can<br>be formed when<br>handling this<br>product: Non-<br>specified (inert or<br>nuisance) dust |         | TWA  | 3 mg/m3<br>respirable | US (ACGIH)<br>2005     |                           |

Consult local authorities for acceptable exposure limits.

## 8.2 Exposure controls

#### **Engineering measures**

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

#### Personal protective equipment

| Respiratory protection | <ul> <li>Use process enclosures, local exhaust ventilation, or other<br/>engineering controls to keep airborne levels below<br/>recommended exposure limits.</li> <li>When workers are facing concentrations above the exposure<br/>limit they must use appropriate certified respirators.</li> <li>Use appropriate respiratory protection where atmosphere<br/>exceeds recommended limits.</li> <li>Where workers could be exposed to dust concentrations</li> </ul> |
