SAFETY DATA SHEET	lyondellbasell
Hostalen CRP 100 RCD B	
Version 1.1 Revision Date	
1. IDENTIFICATION OF THE SUBS	TANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING
Trade name	: Hostalen CRP 100 RCD BLACK
CAS Number: Chemical name Synonyms	<ul> <li>Mixture</li> <li>Compounded polyolefin</li> <li>Polyolefin, Compounded polymer</li> </ul>
Identified uses	: Manufacture of plastic articles by injection molding, extrusion or other conversion process.
Prohibited uses	: FDA Class III medical devices; European class III medical devices; Health Canada class IV Medical Devices; Applications involving permanent implantation into the body; Life-sustaining medical applications
<u>Company Address</u> LyondellBasell Australia Pty. L Level 4, 650 Chapel Street South Yarra Vic 3141 Australia	td. +61 (3) 9829 9455 product.safety@lyb.com
<u>Emergency telephone numb</u> 1800 816 854 (AUSTRALIA O	
E-mail address Responsible/issuing person	: product.safety@lyb.com
2. HAZARDS IDENTIFICATION	
GHS-Classification	
Not classified as hazardous	according to criteria of Worksafe Australia.
GHS-Labeling	
Not classified as hazardous	according to criteria of Worksafe Australia.
Other hazards	
If small particles are generat combustible dust concentrat	ed during further processing, handling or by other means, may form ions in air.

SAFETY DATA SHEET		lyondellbasell					
Hostalen CRP 100 RCD B	LACK	Gen. Variant: SDS_AU					
Version 1.1 Revision Date 2	2019-09-27 Print Date 20	22-01-05 SDS No.: BE13226					
3. COMPOSITION/INFORMATION C	N INGREDIENTS						
Mixtures							
Components							
Chemical name	CAS-No.	<u>Weight %</u>					
Proprietary blend of polyolefinic polymers	Mixture	95.0 - 100.0 %					
Contains: Additives and stabiliz	ers						
4. FIRST AID MEASURES							
General advice	: Take proper precautions to before attempting rescue an	ensure your own health and safety d providing first aid.					
If inhaled	<ul> <li>Remove person to fresh air. If signs/symptoms continue, get medical attention.</li> <li>In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air.</li> <li>Obtain medical attention.</li> <li>Keep person warm, if necessary give Cardio-Pulmonary Resuscitation (CPR)</li> </ul>						
In case of skin contact							
In case of eye contact	: Flush eyes thoroughly with with medical attention if discomform	water for several minutes and seek ort persists.					
	minutes.	th cool running water for at least 15 ttempt to remove the material					
If swallowed	: Adverse health effects due t	o ingestion are not anticipated.					
Notes to physician

SAFETY DATA SHEET	lyondellbasell
Hostalen CRP 100 RCD BL	ACK Gen. Variant: SDS_AU
Version 1.1 Revision Date 20	019-09-27 Print Date 2022-01-05 SDS No.: BE13226
Symptoms :	Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
Hazards :	Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
Treatment :	Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media :	SMALL FIRE: Use dry chemical, CO2, or water spray.
:	LARGE FIRES: Use water spray hose nozzles from a safe location.
Unsuitable extinguishing : media	None known.
Specific hazards during fire : fighting	Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).
Special protective equipment : for fire-fighters	Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
Further information :	Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulfed in fire. Do not attempt to get on top of storage containers involved in fire. Cool storage containers with large volumes of water even after fire is out.

Version 1.1 Revision Date 2	019-09-27 Print Date 2022-01-05 SDS No.: BE13226
6. ACCIDENTAL RELEASE MEASUR	₹ES
Personal precautions	: Equip responders with proper protection. Creates dangerous slipping hazard on any hard smooth surface. Equip emergency responders with proper personal protective equipment (PPE)
	Avoid generating dust. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Potential combustible dust hazard. Polymer particles create slipping hazard on hard smooth surfaces.
Environmental precautions	: Do not flush into surface water or sanitary sewer system.
Methods for containment / : Methods for cleaning up	On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk. On water, material is insoluble; collect and contain as any solid. All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.
7. Handling and storage	
Precautions for safe handling	
-	Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air. Avoid dust accumulation in enclosed space. Use dust collection systems designed per NFPA 654 to avoid dust accumulation. Avoid generating dust; fine dust suspended in air and in the presence of an ignition source is a potential dust explosion hazard. Static discharge (spark), or other ignition sources, in high dust environments may ignite the dust and result in a dust explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and grounded (earthed) and bonded. Metal containers involved in the transfer of this material should be grounded and bonded.

### hongrunplastics.com lyondellbasell SAFETY DATA SHEET Hostalen CRP 100 RCD BLACK Gen. Variant: SDS AU Version 1.1 Revision Date 2019-09-27 Print Date 2022-01-05 SDS No.: BE13226 All electrical equipment should conform to applicable electric codes and regulatory requirements for areas handling combustible dusts. After handling, always wash hands thoroughly with soap and water. When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation. See section 10. Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids, for safe handling. Conditions for safe storage, including any incompatibilities Requirements for storage : Store in a dry location. Use good housekeeping practices during storage, transferring areas and containers and handling. Process enclosures and adequate ventilation should be used to avoid excessive dust accumulation. Store away from excessive heat and away from strong oxidizing agents. Keep container closed to prevent contamination. Take measures to prevent the build up of electrostatic charge. Specific end use(s) : See Section 1. 8. EXPOSURE CONTROLS/PERSONAL PROTECTION **Control parameters** Ingredients with workplace control parameters **Occupational Exposure Limits** Components CAS-No. Limit Value Additional Type Basis **Revision Date** Information Materials that can TWA 10 mg/m3 US (ACGIH) inhalable 2005 be formed when handling this product: Nonspecified (inert or nuisance) dust

#### (+) 188 1699 6168 hongrunplastics.com lyondellbasell SAFETY DATA SHEET Hostalen CRP 100 RCD BLACK Gen. Variant: SDS AU Version 1.1 Revision Date 2019-09-27 Print Date 2022-01-05 SDS No.: BE13226 3 mg/m3 TWA US (ACGIH) Materials that can respirable 2005 be formed when handling this product: Nonspecified (inert or nuisance) dust

Consult local authorities for acceptable exposure limits.

#### Exposure controls

#### Engineering measures

Follow the recommendations in NFPA 654 (as amended and adopted) for equipment used to handle this product.

Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Equipment and vessels handling combustible dust from this material should be designed to either prevent dust explosions (inerting) or safely vent dust explosions per NFPA 654

Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

#### Personal protective equipment

Respiratory protection	:	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.
Hand protection	:	Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection	:	Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection	:	Wear suitable protective clothing.
Hygiene measures	:	Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use.
