Microthene MP652762

lyondellbasell

High Density Polyethylene Powder Rotational Molding Grade Melt Index 2.0 Density 0.942

Applications *Microthene* MP652762 is a hexene HDPE powder used mainly for rotationally molding large tank applications. MP652662 is a UV 8-stabilized, 35-mesh powder and is also available in pellet form as *Petrothene* GA652762.

Regulatory<br/>StatusMP652762 meets the requirements of the Food and Drug Administration, 21CFR Section<br/>177.1520. This regulation allows the use of this olefin polymer in "...articles or components of<br/>articles intended for use in contact with food..." Specific limitations or conditions of use may apply.<br/>Contact your Equistar sales representative for more information.

Processing Techniques

Typical Properties Specific recommendations for conditions under which MP652762 should be processed can be made only when the end use and type of processing equipment are known. For exact recommendations, please contact your Equistar sales representative.
