Linear Low Density Polyethylene

## **Product Description**

*Icorene* 3570 is a linear low density polyethylene for rotational molding applications such as high end coolers, toys, playgrounds, tanks, etc. The grade is UV stabilized and suitable for applications requiring good stiffness and processability. Very good mold surface finish.

| Processing Method | Rotomolding   |
|-------------------|---|
| Attribute         | Good Toughness; UV Resistant                          |
| Forms             | Powder  |
| Appearance        | Colors Available                                      |
| Additive          | UV Stabilizer   |
| Application       | General Purpose; Outdoor Applications; Sporting Goods |
|                   |   |
