## Schulatec PP EC 1009 HI BLACK

Polypropylene Copolymer  
LyondellBasell Industries  
Engineering Plastics

### Product Description

PP reinforced compound with improved impact resistance. Electrical conductive material fulfilling ESD requirements.

### General

|                     |                     |
|---------------------|---------------------|
| Appearance          | • Black             |
| Processing Method   | • Injection Molding |
| Resin ID (ISO 1043) | • PP-HI (GF+NT)     |

### Injection Notes

#### Predrying

In general no predrying, only when moisture on granulate surface predrying at 80°C for 2-3 hours is recommended.

#### Reprocessing

Recycled content use possible 10 - 30%. The recycled content from sprues, etc. has to be dry, and not mixed with any other materials.

#### Shut down

PP can normally be left in the cylinder. It is quite insensitive to temperature.

#### Remarks

In contact with copper the melt will be degraded. For permanent processing of glass fibre reinforced grades wear resistant screws and cylinders are recommended.
