Moplen EP548V

Polypropylene, Impact Copolymer

Product Description

Moplen EP548V is a nucleated heterophasic copolymer with antistatic additivition used for injection moulding applications. It exhibits an outstanding balance of mechanical properties combined with a high fluidity.

Moplen EP548V is extensively used in housewares and in thin-walled containers for food packaging (e.g. margerine tubs, yoghurt pots, etc.).

This grade is not intended for medical and pharmaceutical applications.
