Moplen RP248R

Polypropylene, Random Copolymer

Product Description

Moplen RP248R is a random copolymer with good fluidity used in injection moulding applications.

Moplen RP248R is clarified and contains antistatic additivation. It exhibits a very high transparency combined with a very good impact strength, even at 0°C.

Moplen RP248R is typically used by customers in housewares and thin walled containers with high impact strength requirements.

This grade is not intended for medical and pharmaceutical applications.
