

**ASTM F 1683** 

# Micromax<sup>TM</sup> ME201

# **Electronic Inks and Pastes**

#### Carbon Conductor

Micromax™ ME201 is part of the Micromax™ suite of materials developed for In Mold Electronic applications. Micromax™ ME201 is a carbon conductive ink capable of withstanding thermoforming and overmolding temperatures.

#### Product benefits

- Flexible, conductive carbon composition for In Mold Electronics
- Excellent adhesion directly on Polycarbonate
- · Excellent performance after thermoforming and injection molding

#### **Product information**

| Solvent or thinner | Micromax™ 3610           |
|--------------------|--------------------------|
| Density            | 1.6 g/cm <sup>3</sup>    |
| Solid content      | 30 - 34 <sup>[1]</sup> % |

[1]: 150°C

# Rheological properties

| Viscosity | 40 - 75 <sup>[2]</sup> F | ⁻a.s |
|-----------|--------------------------|------|
|           |                          |      |

[2]: Brookfield RVT, #14 spindle, 10 rpm, 25°C

## Application technique

| Drying time                       | 20 <sup>[3]</sup> min                       |
|-----------------------------------|---|
| Drying temperature                | 120 <sup>[3]</sup> °C                       |
| Theoretical coverage              | 200 - 400 <sup>[4]</sup> cm <sup>2</sup> /g |
| Recommended film thickness, dried | 8 - 12 μm                                   |

[3]: box oven

[4]: 200 : at 10µm, 400 : at 5µm

### Typical mechanical properties

| Adhesion cross hatch | 5R <sup>[5]</sup> class |
|----------------------|-------------------------|
| AODESION CIOSS DAICH | DD:: CIASS              |

[5]: ASTM D3359-78

#### Electrical properties

| Surface resistivity                                 | ≤750000 <sup>[6]</sup> | mOhm per |
|---|------------------------|----------|
|   |                        | square   |
| Resistivity retention after crease, 180°C, 1 cycle, | ≤35 <sup>[7]</sup>     | %        |

Resistivity retention after crease, 180°C, 1 cycle,

[6]: at 25.4µm, 5µm dried print thickness on ST505 PET Film

[7]: ASTM F1683, 180°, 1 cycle, 2kg

# Micromax<sup>TM</sup> ME201

#### **Electronic Inks and Pastes**

### Storage and stability

Shelf life 6<sup>[8]</sup> months

[8]: in unopened containers, from date of shipment, at temperature <25  $^{\circ}\text{C}$ 

#### Additional information

How to use Processing

- Substrates
  - Polycarbonate, surface treated polyester
- Screen types
  - · Polyester, stainless steel
- Printing
  - · Reel-to-reel, semi-automatic or manual
- Work life
  - ∘ > 1 hour
- Clean-up solvent
  - Ethylene diacetate
- Drying
  - Box oven: 120°C for 20 minutes
  - Reel-to-reel: 120°C for 4 minutes
  - After printing, Micromax<sup>™</sup> ME201 will interact with polycarbonate if left wet for extended periods. It is therefore recommended to dry as soon as possible after printing.
  - Drying is a critical processing step and in order to achieve optimum performance, sufficient temperature/time should be allowed to ensure complete removal of solvent.
  - Dry in a well-ventilated box oven or belt/conveyor furnace. Air flow and extraction rates should be optimized to ensure complete removal of solvent from the paste. A strong air flow may help to reduce the drying temperature combination. It will also aid in achieving the lowest as-printed resistance.

#### Thermoforming

• Thermoforming performance of Micromax<sup>TM</sup> ME201 can vary depending on the build structure, processing conditions, thermoforming technique, and equipment used. As such, parameters need to be assessed and optimized. If more precision is needed with printed symbols and structures, high pressure forming has shown to give more accuracy as it ensures more even stretch. Forming temperatures around 160°C can be used. Stretchability >50% can be achieved.

#### Typical Physical Properties

| Test   | Properties |
|--|------------|
| Abrasion Resistance, Pencil Hardness (ASTM D3363-74) [H] | 1          |

Information in this datasheet shows anticipated typical physical properties for Micromax<sup>TM</sup> ME201 based on specific controlled experiments in our labs and are not intended to represent the product specifications, details of which are available upon request.

### Storage and shelf life

Containers should be stored, tightly sealed, in a clean, stable environment at room temperature (<25°C). Shelf life of material in unopened containers is six months from date of shipment. Some settling of solids may occur and compositions should be thoroughly mixed prior to use.

## Safety and handling

For safety and handling information pertaining to this product, read Safety Data Sheet (SDS).

NOTICE TO USERS: Values shown are based on testing of laboratory test specimens and represent data that fall within the standard range of properties for natural material. These values alone do not represent a sufficient basis for any part design and are not intended for use in establishing maximum, minimum, or ranges of values for specification purposes. Colourants or other additives may cause significant variations in data values. Properties of moulded parts can be influenced by a wide variety of factors including, but not limited to, material selection, additives, part design conditions and environmental exposure. Other than those products expressly identified as medical grade (including by MT® product designation or otherwise), Celanese's products are not intended for use in medical or dental implants. Regardless of any such product designation, any determination of the suitability of a particular material and part design for any use contemplated by the users and the manner of such use is the sole responsibility of the users, who must assure themselves that the material as subsequently processed meets the needs of their particular product or use. To the best of our knowledge, the information contained in this publication is accurate; however, we do not assume any liability whatsoever for the accuracy and completeness of such information. The information contained in this publication should not be construed as a promise or guarantee of specific properties of our products. It is the sole responsibility of the users to investigate whether any existing patents are infringed by the use of the materials mentioned in this publication, we neither suggest nor guarantee that such hazards are the only ones that exist. We recommend that persons intending to rely on any recommendation or to use any equipment, processing technique or material mentioned in this publication should satisfy themselves that they can meet all applicable safety and health standards. We strongly recommend that users seek and adhere to the manufac
