

Amodel® FC-1140 STL

polyphthalamide

Amodel® FC-1140 STL is an FDA compliant, 40% glass fiber reinforced resin designed for high strength and stiffness along with improved demolding properties. This combines with excellent thermal properties, low water absorption and good hydrolytic stability to make it particularly suited for components used in food service and consumer applications, such coffee machines and ovens.

The STL series of Amodel® PPA was developed specifically for food and beverage applications that require limited

General

Material Status	• Commercial: Active	
Availability	• Africa & Middle East • Asia Pacific • Europe	• Latin America • North America
Filler / Reinforcement	• Glass Fiber, 40% Filler by Weight	
Features	• Chemical Resistant • Chlorine Resistant • Creep Resistant • Good Dimensional Stability • High Stiffness	• High Strength • High Temperature Strength • Low Moisture Absorption • Lubricated
Uses	• Appliances • Consumer Applications • Filters • Housings	• Industrial Applications • Plumbing Parts • Pump Parts • Valves/Valve Parts
Agency Ratings	• EU 10/2011	• FDA 21 CFR 176.170(c)
RoHS Compliance	• RoHS Compliant	
Appearance	• Black	• Natural Color
Forms	• Pellets	
Processing Method	• Injection Molding

Injection Notes

Storage:

- Amodel® compounds are shipped in moisture-resistant packages at moisture levels according to specifications. Sealed, undamaged bags should be preferably stored in a dry room at a maximum temperature of 50°C (122°F) and should be protected from possible damage. If only a portion of a package is used, the remaining material should be transferred into a sealable container. It is recommended that Amodel® resins be dried prior to molding following the recommendations found in this datasheet and/or in the Amodel® processing guide.
