

The TOTAL Automotive team is available to discuss its global product offerings into this fast-paced, growing market. In Europe and globally, we offer a wide range of products, both impact copolymers and compounds to satisfy the specialized PP and TPO applications in a vehicle – bumpers, side protections, door lists, rocker panels, body panels, spoilers, fenders, cowl covers, instrument panels, pillars, trims, air ducts, etc.

In North America, we concentrate for now on only a few applications, especially with localized TPO compounds production. The following is a “short” list of the Finalloy® grades currently available from US production :
