

Technical Data Sheet

Eastman™ Butyric Acid, Food Grade, Kosher

Key Attributes

- APHA color of 15 maximum
- Assay of 99.5 % minimum
- For use in Food application
- Manufactured and handled in accordance with appropriate current Good Manufacturing Practices (cGMP)
- Manufactured and handled under a Hazard Analysis Critical Control Point (HACCP) program
- Manufactured under Rabbinical supervision. This product is Kosher and Pareve for all year use, including Passover.

Product Description

Eastman™ Butyric acid (C_3H_7COOH) is a clear, colorless liquid, with a strong pungent odor. Butyric acid is a naturally occurring short-chain fatty acid found in the human body, butter, and numerous other sources. Esters and salts of butyric acid are used in a variety of applications including perfumes and flavorings. Eastman offers a variety of grades of butyric acid appropriate for these various end uses. This grade of butyric acid is produced under rabbinical supervision in full accordance with Jewish dietary law including Passover.

Typical Properties

Property	Typical Value, Units
General	
Form	Liquid
Color	
Pt-Co	15 max.
Specific Gravity	
@ 20°C/20°C	0.96
Boiling Point	164 °C
Freezing Point	-7.9 °C
Assay	99 wt %
Flash Point	
Tag Closed Cup	71 °C (160 °F)

Comments
