

Technical Data Sheet Tenite™ Acetate 105E3V36327 Clear Trsp

Applications

- Ophthalmics
- Packaging components non food contact
- Tovs

Product Description

Tenite[™] cellulosic plastics are noted for their excellent balance of properties - toughness, hardness, strength, surface gloss, clarity, and a warm feel. The mechanical properties if Tenite[™] cellulosic plastics differ with plasticizer levels. Lower plasticizer content yields a harder surface, higher heat resistance, greater rigidity, higher tensile strength, and better dimensional stability. Higher plasticizer content increases impact strength. Tenite[™] cellulosic plastics are available in natural, clear, selected ambers or smoke transparents and black translucent. Color concentrates are available in let-down ratios from 10:1 to 40:1. Tenite[™] Cellulosic Acetate 105-27 has a plasticizer level of 27%.
