

## Sarlink 9000 Series

### 1. GENERAL INFORMATION

---

<b>Product Name</b>	Natural and black SARLINK® 9165, 9175, 9760, & 9770.
<b>Chemical Name &amp; Synonyms</b>	Polyolefin Elastomer Blend, Thermoplastic Elastomer (TPE).
<b>CAS Registry Number</b>	Proprietary blends. Not identified by CAS number. Components of these products are listed under TSCA Chemical Substances Inventory. Black grades contain carbon black, CAS No. 1333-86-4.
<b>Emergency Telephone No.</b>	1-800-424-9300 (Chemtrec)
<b>Information Telephone No.</b>	1-800-524-0120
<b>Prepared by</b>	DSM Thermoplastic Elastomers Inc. 31 Fuller Street Leominster, MA 01453-4451
<b>Date of Issue</b>	August, 2000, Version 3.0

### 2. PHYSICAL DATA

---

<b>Physical State</b>	Solid
<b>Odor and Appearance</b>	No odor; pellets
<b>Odor Threshold</b>	Not applicable
<b>Specific Gravity</b>	0.93 - 0.98
<b>Vapor Pressure</b>	Not applicable, non-volatile material
<b>Vapor Density</b>	Not applicable, non-volatile material
<b>Evaporation Rate</b>	Not applicable, non-volatile material
<b>Boiling Point</b>	Not applicable, solid material
<b>Melting Point</b>	Softens at 150°C (302°F)
<b>pH</b>	Not applicable
<b>Coefficient of Oil/Water Distribution</b>	Not established
<b>Solubility in Water at 20°C</b>	Insoluble

### 3. FIRE OR EXPLOSION HAZARD DATA

---

<b>Flash Point</b>	Not established
<b>Auto Ignition Temperature</b>	Not established
<b>Flammable Limits</b>	Not applicable, non-volatile material
<b>Hazardous Combustion Products</b>	Carbon monoxide, products from incomplete combustion and various hydrocarbon compounds
<b>Extinguishing Media</b>	Use Carbon dioxide, water fog, foam or dry chemical.
<b>Special Firefighting Procedures</b>	Firefighters must wear full-face positive-pressure, self-contained breathing apparatus to provide protection against combustion products. Evacuate all unprotected personnel.
<b>Unusual Fire and Explosion Hazards</b>	Small amounts of fines of products may be formed. Every effort should be made to prevent the accumulation of fines in material handling systems. Equipment and conveying lines must be well grounded to eliminate any build-up of static electricity.
<b>NFPA Rating</b>	Health = 1 (slight) Fire = 1 (slight) Reactivity = 0 (insignificant)

### 4. REACTIVITY DATA

---

<b>Stability</b>	Stable
------------------	--------

<b>Materials to Avoid:</b>	Strong oxidizing agents; Polyacetal resins at processing temperature.
<b>Hazardous Decomposition Products:</b>	Carbon monoxide, various hydrocarbons, products from incomplete combustion.
<b>Hazardous polymerization</b>	Will not occur.

## 5. REGULATORY HAZARD, HEALTH INFORMATION

<b>OSHA</b>	These products are not hazardous under Hazard Communication Standard 29 CFR part 1910.1200 (see note below).
<b>WHMIS DOT/TDG</b>	These products are not hazardous as defined in Canadian WHMIS Regulations. Not regulated by U.S. Department of Transportation and Canadian Transportation of Dangerous Goods Regulations
<b>SARA Title III</b>	These products contain no known toxic chemicals subject to the reporting requirements of section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 and of 40 CFR 372.
<b>TSCA:</b>	All ingredients are on the TSCA Chemical Substance Inventory.
<b>CEPA</b>	Components of these products are included in Canada's DSL (Domestic Substance List).

**Note:** Black grades contain carbon black, which is considered a nuisance dust hazard by OSHA 29 CFR 1910.1000 Subpart Z-1. However, carbon black incorporated into the thermoplastic elastomers in the form delivered, is no longer believed to be a nuisance dust hazard by DSM Thermoplastic Elastomers.

## 6. TOXICOLOGICAL AND HEALTH DATA

<b>Specific Hazard</b>	No acute or chronic hazards or effects are anticipated from the products at ambient temperature, However, at processing temperature, the products can emit fumes and vapors which may cause irritation of the eyes and respiratory tract. Good industrial hygiene and safety practices are always recommended.
<b>Routes of Exposure</b>	Eye contact : Not a probable route of exposure. Particulates may scratch eye surface or cause irritation. Skin contact: Not an anticipated hazard at ambient temperature. Ingestion: Not a probable route of exposure. Inhalation: Not a probable route of exposure under conditions of normal use. Hot fumes or vapors which may form during processing can cause irritation to the respiratory tract.
<b>Toxicology Information</b>	Carcinogenicity: None reported Mutagenicity: None reported Reproductive effects: None reported Teratogenicity: None reported LD50/LC50 data: No test data available

### Additional Information

**Note 1.** Representative grades were rated non-toxic in a cytotoxicity testing.

## 7. PROTECTIVE AND PREVENTIVE MEASURES

<b>Personal Protective Equipment</b>	Eye: Wear safety glasses or chemical goggles Skin: Wear protective gloves when handling elastomer bags or hot material during processing Respiratory: Not normally required at ambient temperature. If processing in area where ventilation is inadequate, wear NIOSH approved organic vapor respirator with mechanical filtration. If processing conditions generate large amounts of dust, wear NIOSH approved respirator for nuisance dust.
<b>Handling Procedures and Equipment</b>	Practice good personal hygiene. Avoid eye contact. Avoid inhalation of fumes or vapors. Avoid generation and prolonged breathing of dust.
<b>Engineering Controls</b>	Local exhaust ventilation is recommended during all hot processing operations.
<b>Exposure Guidelines</b>	Not established.

## 8. EMERGENCY AND FIRST AID PROCEDURES

**Ingestion**

Obtain medical attention if irritation persists or if severe. Implement appropriate controls to prevent further exposures.

**Eyes**

Consult a physician if pain or discomfort occurs.

**Skin**

Remove dust particles by flushing eye with clean water. Seek medical attention.

Wash contaminated skin with mild soap and water. Should a burn occur, cool burn area immediately with cool, clean running water until no heat is emitted from burn area. Cover with light, dry dressing. Obtain medical assistance.

**9. SPILLS, DISPOSAL, STORAGE GUIDELINES****Spill and Release Information**

Repackage uncontaminated elastomer. Reuse or dispose of as noted below if contaminated.

**Disposal Information**

Reuse if possible. Dispose in accordance with local, state, and federal regulations and applicable environmental regulations. Material as supplied is not characterized as hazardous under RCRA (Resource and Conservation Recovery Act).

**Storage**

Store at ambient temperature, in dry area and in the absence of direct sunlight.

**NOTICE:** The information provided herein, presented in good faith, represents the knowledge of the DSM THERMOPLASTIC ELASTOMERS INC. based on the evaluation of current scientific evidence for the components of this product. Users of this material should also make their own investigations including consultation with expert medical and scientific personnel. DSM will continue to evaluate our products updating the information contained in this document as it becomes available.

No representations or warranties, either expressed or implied, of merchantability, fitness for a particular purpose, or of any nature are made herein with respect to information or the product to which information refers.

DSM Thermoplastic Elastomers Inc is an ISO 9001 registered company  
Sarlink® is a registered trademark of DSM, The Netherlands.
