

# Geon™ Vinyl Flexible R290AE

## Flexible Polyvinyl Chloride

### Key Characteristics

| General               |  |                             |                     |
|-----------------------|--|-----------------------------|---------------------|
| Material Status       | • Commercial: Active                     |                             |                     |
| Regional Availability | • Africa & Middle East<br>• Asia Pacific | • Europe<br>• Latin America | • North America     |
| Additive              | • UV Stabilizer                          |                             |                     |
| Features              | • High Gloss                             | • UV Absorbing              |                     |
| Uses                  | • Profiles                               |                             |                     |
| Appearance            | • Clear/Transparent                      |                             |                     |
| Forms                 | • Pellets                                |                             |                     |
| Processing Method     | • Extrusion                              | • Injection Molding         | • Profile Extrusion |

### Technical Properties <sup>1</sup>

| Physical                                | Typical Value (English) | Typical Value (SI) | Test Method |
|---|-------------------------|--------------------|-------------|
| Density / Specific Gravity              | 1.30                    | 1.30               | ASTM D792   |
| Mechanical                              | Typical Value (English) | Typical Value (SI) | Test Method |
| Tensile Strength <sup>2</sup> (Break)   | 3450 psi                | 23.8 MPa           | ASTM D638   |
| Tensile Elongation <sup>2</sup> (Break) | 200 %                   | 200 %              | ASTM D638   |
| Hardness                                | Typical Value (English) | Typical Value (SI) | Test Method |
| Durometer Hardness (Shore D, 15 sec)    | 62                      | 62                 | ASTM D2240  |
| Thermal                                 | Typical Value (English) | Typical Value (SI) | Test Method |
| Brittleness Temperature                 | 27.0 °F                 | -2.78 °C           | ASTM D746   |

#### Additional Information

Durometer Hardness, ASTM D2240, D Scale (15 sec): 60 to 64

### Processing Information

| Injection              | Typical Value (English) | Typical Value (SI) |
|------------------------|-------------------------|--------------------|
| Processing (Melt) Temp | 380 to 410 °F           | 193 to 210 °C      |
| Extrusion              | Typical Value (English) | Typical Value (SI) |
| Melt Temperature       | 355 to 375 °F           | 179 to 191 °C      |

#### Notes

<sup>1</sup> Typical values are not to be construed as specifications.

<sup>2</sup> Type IV, 20 in/min (510 mm/min)
