

PolyOne LL 170 White

Linear Low Density Polyethylene

Key Characteristics

Product Description

This concentrate is designed for polyethylene film. It can also be used for sheet extrusion, blow molding and injection molding. It can be used with all polyolefin resins (LDPE, LLDPE, HDPE, and PP).

General

Material Status	• Commercial: Active	
Regional Availability	• North America	
Features	• General Purpose	
Uses	• Film	• General Purpose
Appearance	• White	
Forms	• Pellets	
Processing Method	• Blow Molding • Blown Film	• Injection Molding • Sheet Extrusion

Technical Properties ¹

Additional Information	Typical Value (English)	Typical Value (SI)
Loading	70 %	70 %
Pigment Type	Rutile Titanium Dioxide	Rutile Titanium Dioxide

Notes

¹ Typical values are not to be construed as specifications.
