

PolyOne LL 250 Black

Linear Low Density Polyethylene

Key Characteristics

Product Description

LL 250 Black is designed for thin film applications requiring good carbon black dispersion. It can be used for injection molding, blow molding, and sheet extrusion. The carbon black and base resin have been selected for good compatibility with most polyethylene film resins.

General

Material Status	• Commercial: Active	
Regional Availability	• North America	
Appearance	• Black	
Forms	• Pellets	
Processing Method	• Blow Molding	• Injection Molding
	• Blown Film	• Sheet Extrusion

Technical Properties ¹

Additional Information	Typical Value (English)	Typical Value (SI)
Loading	50 %	50 %
Pigment Type	Carbon Black	Carbon Black

Notes

¹ Typical values are not to be construed as specifications.
