

OnFlex™-S SL 40A-3S1867

Styrenic Thermoplastic Elastomer

Key Characteristics

Product Description

OnFlex™-S SL thermoplastic elastomer compounds are based on hydrogenated styrenic block copolymers. This range of compounds are formulated to deliver excellent mechanical properties in addition to typical OnFlex™-S properties such as a wide hardness range, low compression set, good processability, good colourability and a wide temperature operating range. Being unfilled, OnFlex™-S SL compounds are translucent and have a low density.
