

# Synprene™ RT-5190 RoHS Black

## Styrene Butadiene Block Copolymer

### Key Characteristics

#### Product Description

Synprene™ thermoplastic elastomers (TPEs) are compounds based on styrenic block copolymer (SBC) technology, and can be formulated to deliver extremely low hardness values not found in other elastomers. These materials are ideal for applications requiring flexibility over a wide temperature range, excellent colorability, broad processing capability and durability.
