

PRIMACOR™ 3330

Copolymer

Introduction

PRIMACOR™ 3330 Copolymer is an ethylene acrylic acid copolymer which has been specifically designed by SK for use as an adhesive or sealant layer in extrusion/coextrusion coating and lamination.

PRIMACOR™ 3330 Copolymer exhibits:

- Excellent adhesion to paper, paperboard, metals and polyethylenes
- · Excellent hot-tack and sealability
- Excellent toughness
- Excellent oil and grease resistance
- Insensitivity to moisture

Applications:

- Flexible packaging laminates
- Plastic tube laminates

Complies with:

• US. FDA 21 CFR 177.1310(a)(1)

• EU. No 10/2011

Additives:

Antiblock: No

• Slip: No

Properties

		Nominal Value (English)	Nominal Value (SI)	Test Method
Resin Properties	Density	0.932 g/cm ³	0.932 g/cm ³	ASTM D792 ISO 1183
	Melt Index (2.16 kg @190°C)	5.8 g/10min	5.8 g/10min	ASTM D1238 ISO 1133
	Comonomer Content ¹	6.5 %	6.5 %	SK Method
	Vicat Softening Temperature	185 °F	85.0 °C	ASTM D1525 ISO 306/A

 $^{^1}$ Comonomer content measured by a SK proprietary method that has equivalent accuracy as compared to ASTM D 4094. 2 25g/m² coatings at 290°C set temperature.

These are typical values and are not be construed as specifications. The physical properties are highly dependent on the manufacturing conditions. So customers should confirm performances by their own tests.
