

Material Safety Data Sheet

Identity
No.

GHS-EPS-R02

EPS Resin

Pages

1/10

1. Identification of the product and the supplier

1) Chemical Name : EPS Resin

2) Advisable use and Restriction

☐ Advisable use :Plastic

☐ Restriction of product using :Used for recommended use.

3) Manufacturer/Supplier/Distributor information

☐ Company : LG Chem, LTD. Yeosu plant

☐ Address : 55, Yeosusandan 2-ro, Yeosu-si, Jeollanam-do

☐ Emergency response number : +82-61-680-1273

☐ Respondent : EPS Production Team C/R

2. Hazard identification

1) Hazard classification :

- Acute toxicity (oral) : Category 5

- Acute toxicity (dermal) : Category 5

- Hazardous to the aquatic environment (acute hazard) : Category 3

2) Allocation label elements

<input type="radio"/> Pictogram and symbol	<input type="radio"/> Signal word	<input type="radio"/> Hazard statement
Not applicable	Warning	H303: May be harmful if swallowed. H313: May be harmful in contact with skin. H402: Harmful to aquatic life.

☐ Precautionary statements

[Prevention] :

P273: Avoid release to the environment.

[Response] :

P312: Call a poison center or doctor/physician if you feel unwell.

[Storage] : Not applicable

[Disposal] :

P501: Dispose of contents/container to in accordance with local/regional/national/international regulations (to be specified).

3) Other hazard information not included in hazard classification

☐ NFPA Rating system : \

Health: Not available, Flammability: Not available, Reactivity: Not available

3. Composition/information on ingredients

Chemical Name	Common name Synonyms	CAS No.	Content (%)
Polystyrene	<ul style="list-style-type: none">• Benzene, ethenyl-, homopolymer• Toporex• Vestyron• Styron• Esbrite	9003-53-6	93~95 %
Pentane	<ul style="list-style-type: none">• Pentane• Amyl hydride• Skellysolve A	109-66-0	5~6 %

4. First-aid measures

1) Eye contact:

- Call emergency medical service.
- In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.

2) Skin contact:

- Call emergency medical service.
- Remove and isolate contaminated clothing and shoes.
- In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.
- For minor skin contact, avoid spreading material on unaffected skin.

3) Inhalation:

- Move victim to fresh air.
- Keep victim warm and quiet

4) Ingestion:

- Call emergency medical service.
- Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.

5) Indication of immediate medical attention and notes for physician:

- Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

5. Fire-fighting measures

1) Suitable (and unsuitable) extinguishing media:

- Suitable extinguishing media: Dry sand, dry chemical, alcohol-resistant foam, water spray, regular foam, CO2
- Unsuitable extinguishing media: High pressure water streams.

2) Specific hazards arising from the chemical (ex: hazardous combustion products):

- May be ignited by heat, sparks or flames
- Containers may explode when heated.
- Some of these materials may burn, but none ignite readily.
- Fire will produce irritating and/or toxic gases.
- If inhaled, may be harmful.

3) Special protective equipment and precautions for fire-fighters:

- Dike fire-control water for later disposal; do not scatter the material.
- Move containers from fire area if you can do it without risk.
- Fire involving Tanks; Cool containers with flooding quantities of water until well after fire is out.
- Fire involving Tanks; Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.
- Fire involving Tanks; Always stay away from tanks engulfed in fire.

6. Accidental release measures

1) Personal precautions, protective equipment and emergency procedures:

- Eliminate all ignition sources
- Stop leak if you can do it without risk.
- Do not touch or walk through spilled material.
- Cover with plastic sheet to prevent spreading.
- Prevent dust cloud
- Please note that there are materials and conditions to avoid.

2) Environmental precautions and protective procedures:

- Prevent entry into waterways, sewers, basements or confined areas.

3) The methods of purification and removal:

- Absorb or cover with dry sand, earth or other non-combustible material and transfer to containers.
- Large Spill; Dike far ahead of liquid spill for later disposal.
- With clean shovel place material into clean, dry container and cover loosely; move containers from spill area.
- Powder Spill; Cover powder spill with plastic sheet or tarp to minimize spreading and keep powder dry.
- Small Spill; Take up with sand or other non-combustible absorbent material and place into containers for later disposal.

7. Handling and storag

1) Precautions for safe handling:

- Please note that materials and conditions to avoid.
- Wash thoroughly after handling.
- Please work with reference to engineering controls and personal protective equipment.
- Be careful to high temperature. .

2) Conditions for safe storage:

- Store in a closed container.
- Store in cool and dry place.

8. Exposure controls/personal protection

1) Occupational Exposure Limits

	Polystyrene	Pentane
Korean Occupation of Safety and Health Regulation	Not available	TWA : 600 ppm (1,800 mg/m ³), STEL : 750 ppm (2,250 mg/m ³)
ACGIH	Not available	TWA: 600 ppm
OSHA	Not available	TWA : 600 ppm (1,800 mg/m ³)
NIOSH	Not available	TWA: 120 ppm (350 mg/m ³)
Biological exposure index	Not available	Not available
EU Regulation	Not available	TWA: 1,000 ppm (3,000 mg/m ³)
Other	<ul style="list-style-type: none"> - Czech Republic: OEL-TWAs=5.0 mg/m³ (dust) - Russia: OEL-MACs=10 mg/m³ (aerosol) - Slovak Republic: OEL-TWAs= 5.0 mg/m³ (total solid aerosol) 	<ul style="list-style-type: none"> - Australia: OEL-TWAs=1,770 mg/m³, OELSTEL=2,210mg/m³ - Belgium: OEL-TWAs=1,800 mg/m³, OELSTEL=3,600mg/m³ - Bulgaria: OEL-TWAs=3,000 mg/m³ - China: OEL-TWAs=500 mg/m³, OEL-STEL=1,000 mg/m³ - Czech Republic: OEL-TWAs=2,000 mg/m³ - Denmark: OEL-TWAs=1,500 mg/m³ - Finland: OEL-TWAs=1,500 mg/m³, OEL-STEL=1,900 mg/m³ - Greece: OEL-TWAs=2,950 mg/m³, OEL-STEL=2,950 mg/m³ - Italy: OEL-TWAs=2,000 mg/m³ - Slovak Republic: OEL-TWAs=3,000mg/m³

2) Appropriate engineering controls

- Provide local exhaust ventilation system or other engineering controls to keep the airborne concentrations of

3) Personal protective equipment:

○ Respiratory protection:

- Wear NIOSH or European Standard EN 149 approved full or half face piece (with goggles) respiratory protective equipment when necessary
- In case exposed to particulate material, the respiratory protective equipments as follow are recommended. ;facepiece filtering respirator or air-purifying respirator, high-efficiency particulate air(HEPA) filter media or respirator equipped with powered fan, filter media of use(dust, mist, fume)
- In lack of oxygen(< 19.5%), wear the supplied-air respirator or self-contained breathing apparatus.oxygen

- Eye protection:
 - Wear facepiece with goggles to protect.
 - An eye wash unit and safety shower station should be available nearby work place.
 - Wear breathable safety goggles to protect from particulate material causing eye irritation or other disorder.
- Hand protection:.
 - Wear chemical resistant gloves.
 - Wear appropriate protective gloves by considering physical and chemical properties of chemicals.
- Body protection:
 - Wear appropriate protective chemical resistant clothing.
 - Wear appropriate protective clothing by considering physical and chemical properties of chemicals.

9. Physical and chemical properties

1) Appearance	White sphericity bead / Solid
2) Odor	Odorless
3) Threshold of odor	Not applicable
4) pH	Not applicable
5) Melting point/freezing point	240 °C
6) Initial boiling point and boiling range	Not applicable
7) Flash point	345~360 °C
8) Evaporation rate	Not applicable
9) Flammability (solid, gas)	Not available
10) Upper/lower flammability or explosive limits.	Not applicable
11) Vapour pressure	Not applicable
12) Solubility(ies)	Insoluble
13) vapour density	Not applicable
14) Specific gravity	1.04~1.111 g/cm ³ (20 °C)
15) n-octanol/water partition coefficient	Not available
16) Auto ignition temperature	488~496 °C
17) Degradation temperature	Not available
18) Viscosity	Not applicable
19) Molecular weight	Not available

10. Stability and reactivity

- 1) Chemical stability and Possibility of hazardous reactions:
 - Fire may produce irritating and/or toxic gases.

2) Conditions to avoid (e.g., static discharge, shock or vibration):

- Heat, sparks or flames.

3) Incompatible materials: Not available

4) Hazardous decomposition products: Not available

11. Toxicological information

Information of Health Hazardous:

○ Acute toxicity:

• oral: Category 5 (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** LD50= 5,000 mg/kg bw (rat)

• dermal: Category 5 (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** LD50= 3,000 mg/kg bw (rabbit)

• Inhalation: Not classified

- **Polystyrene:** LC50=56.6 mg/L/30min (unit conversion: 7.075 mg/L/4hr) (rat)

- **Pentane:** LC50=295 mg/l/2hr (unit conversion: 147.5 mg/l/4hr) (mouse)

○ Skin Corrosion/ Irritation: Not classified (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** In test on skin irritation with rabbits, skin irritation was not observed. (OECD TG 404)

○ Serious Eye Damage/ Irritation: Not classified (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** Transient injury to the conjunctiva was observed after ocular exposure to a single installation of 0.1 ml n-pentane, whereas no corneal or iridal responses were observed.

○ Respiratory sensitizer: Not available

○ Skin Sensitization: Not classified (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** In a Guinea Pig Maximisation test n-pentane did not show any sensitisation potential.

○ Carcinogenicity: Not classified (5~6 % of this product consist of an ingredient of unknown toxicity)

- **Polystyrene:** IARC: 3

○ Mutagenicity: Not classified (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** Negative reation were observed in vitro (Ames test, Reverse mutation assay) and in vivo (Dominant lethal assay)

○ Reproductive toxicity: Not classified (93~95 % of this product consist of an ingredient of unknown toxicity)

- **Pentane:** In a 13-week subchronic inhalation toxicity study in male and female rats no signs of toxicity were observed on the reproductive system by macroscopic or microscopic evaluation after exposure to n-pentane up to 20,000 mg/m³ (6,660 ppm).

○ Specific target organ toxicity (single exposure): Not classified (93~95% of this product consist of an ingredient of unknown toxicity)

- **Pentane:** It has caused narcotic effects in mice at concentration of 96 mg/l and after 5 min exposure.

- Specific target organ toxicity (repeat exposure): Not classified (93~95% of this product consist of an ingredient of unknown toxicity)
 - **Pentane:** In a recent 13 week sub-chronic inhalation toxicity study in rats no systemic toxicity was observed following n-pentane exposure up to 20,000 mg/m³ (6,660 ppm), and a NOAEL from this study was set at $\geq 20,000$ mg/m³ (6,660 ppm).
- Aspiration Hazard: Not classified (93~95% of this product consist of an ingredient of unknown toxicity)
 - **Pentane:** Based on the values of the kinematic viscosity for n-pentane ($3.58 \cdot 10^{-7}$ m²/s), n-pentane has the potential to cause chemical pneumonia

12. Ecological information

1) Ecological toxicity:

- Acute toxicity: Category 3
- Chronic toxicity: Not available
- Fish:
 - **Polystyrene:** 48hr-LC50(*Oryzias latipes*)> 500 mg/l
 - **Pentane:** 96hr-LC50(*Ozyrias latipes*)= 9.6 mg/l
- Crustacea:
 - **Pentane:** 96hr-EC50(*Daphnia magna*)= 9.74 mg/l
- Algae:
 - **Pentane:** 96hr-EC50(*Scenedesmus subspicatus*)= 1.1 mg/l

2) Persistence and degradability:

- Persistence:
 - **Pentane:** Low persistency (log Kow is less than 4 estimated. (log Kow=3.45)
- Degradability: Not available

3) Bioaccumulative potential:

- Bioaccumulation:
 - **Pentane:** Bioaccumulation is expected to be low according to the value of logKow<4 (log Kow=3.45) and BCF<500(BCF=171)
- Biodegradation:
 - **Polystyrene:** In biodegradation test with activated sludge(30 mg/l), 2% biodegradation was observed after 28 days(OECD TG 302C)
 - **Pentane:** In biodegradation test, 70% biodegradation was observed after 192 hours.

4) Mobility in soil:

- **Pentane:** Low potency of mobility to soil. (Koc values = 80 (estimated) L/kg)

13. Disposal considerations

- 1) Disposal method:
 - Incinerate the waste
 - Bury the specified waste in the management-typed burial facility after crushing, cutting, or melting in less than the maximum diameter of 15 cm in size, if incineration is not available.
- 2) Disposal precaution:
 - Consider the required attentions in accordance with waste treatment management regulation.

14. Transport information

- 1) UN Number: UN 2211
- 2) UN Proper shipping name: POLYMERIC BEADS, EXPANDABLE evolving flammable vapour
- 3) Transport Hazard class: 9
- 4) Packing group: III
- 5) Marine pollutant: Not applicable
- 6) Special precautions:
 - ☐ in case of fire: F-A
 - ☐ in case of leakage: S-I

15. Regulatory information

Korea:

- ☐ Occupational Safety and Health Regulation:
 - **Pentane:** Occupational exposure limits listed
- ☐ Toxic Chemical Control Act:
 - **Polystyrene:** KE-13257 (Existing Chemical Substance)
 - **Pentane:** KE-27968 (Existing Chemical Substance)
- ☐ Dangerous Material Safety Management Regulation:
 - **Pentane:** Special inflammable, class 4 (50ℓ)
- ☐ Wastes Control Act:
 - **Polystyrene:** Public Controlled Waste (waste synthetic polymer compounds)
 - **Pentane:** Public Controlled Waste

EU classification:

- **Pentane:**
 - Classification: F+; R12 Xn; R65 R66 R67 N; R51-53
 - Risk phrases: R12, R51/53, R65, R66, R67
 - Safety phrases: S2, S9, S16, S29, S33, S61, S62

U.S.A management information:

- OSHA (29CFR1910.119) : Not regulated
- CERCLA 103 (40CFR302.4): Not regulated
- EPCRA 302 (40CFR355.3): Not regulated
- EPCRA 304 (40CFR355.4): Not regulated
- EPCRA 313 (40CFR372.65): Not regulated
- **Polystyrene:** Inventory - United States - Section 8(b) Inventory (TSCA): XU
- **Pentane:** Inventory - United States - Section 8(b) Inventory (TSCA): T

☐ Japan management information:

- **Polystyrene:** Inventory-Existing and New Chemical Substances (ENCS): (6)-120
- **Pentane:** Inventory-Existing and New Chemical Substances (ENCS): (2)-5

☐ China management information:

- **Polystyrene:** Inventory of Existing Chemical Substances (IECSC): Present
- **Pentane:** Inventory of Existing Chemical Substances (IECSC): Present

☐ Canada management information:

- **Polystyrene:** Inventory-Domestic Substances List (DSL): Present
- **Pentane:** Inventory-Domestic Substances List (DSL): Present

☐ Australia management information:

- **Polystyrene:** Inventory-Australia Inventory of Chemical Substances (AICS): Present
- **Pentane:** Inventory-Australia Inventory of Chemical Substances (AICS): Present

☐ New Zealand management information:

- **Polystyrene:** Inventory-New Zealand - Inventory of Chemicals (NZIoC): Present
- **Pentane:** Inventory-New Zealand - Inventory of Chemicals (NZIoC): Present

☐ Substance of Rotterdame Protocol: Not regulated

☐ Substance of Stockholme Protocol: Not regulated

☐ Substance of Montreal Protocol: Not regulated
