

DuPont™ Elvax® 760Q

Elvax® resins Product Data Sheet

Description

Product Description DuPont™ Elvax® 760Q is an ethylene-vinyl acetate copolymer resin for use in industrial applications.

Restrictions

Material Status • Commercial: Active

Availability • Globally

Typical Characteristics

Composition 9.3% By Weight Vinyl Acetate
Thermal Stabilizer: BHT antioxidant

Features High level BHT antioxidant

Applications Elvax® resins can be used in a variety of applications involving molding, compounding, extrusion, adhesives, sealants, and wax blends. For additional information and properties associated with specific applications, please refer to the Grade Selector Guides found on the Elvax® website for industrial applications <http://www.dupont.com/industrial-polymers/elvax/index.html>.

Typical Properties

Physical	Nominal Values	Test Method (s)	
Density ()	0.93 g/cm ³	ASTM D792	ISO 1183
Melt Index (190°C/2.16kg)	2 g/10 min	ASTM D1238	ISO 1133
Thermal	Nominal Values	Test Method (s)	
Melting Point (DSC)	100°C (212°F)	ASTM D3418	ISO 3146
Vicat Softening Point ()	82°C (180°F)	ASTM D1525	ISO 306

Processing Information

General

Maximum Processing Temperature 230°C (446°F)

General Processing Information Elvax® resins can be processed by conventional thermoplastic processing techniques, including injection molding, structural foam molding, sheet and shape extrusion, blow molding and wire coating. They can also be processed using conventional rubber processing techniques such as Banbury, two-roll milling and compression molding.

Elvax can be used in conventional extrusion equipment designed to process polyethylene resins. However, corrosion-protected barrels, screws, adapters, and dies are recommended, since, at sustained melt temperatures above 446°F (230°C), ethylene vinyl acetate (EVA) resins may thermally degrade and release corrosive by-products.

FDA Status Information

ELVAX® 760Q EVA Resin complies with Food and Drug Administration Regulation 21 CFR 177.1350(a)(1) - - Ethylene-vinyl acetate copolymers, subject to the limitations and requirements therein. This Regulation describes polymers that may be used in contact with food, subject to the finished food-contact article meeting the extractive limitations under the intended conditions of use, as shown in paragraph (b)(1) of the Regulation.

Safety & Handling

A Product Safety Bulletin, Material Safety Data Sheet, and more detailed information on compounding and processing Elvax® resins for specific applications are available from your DuPont Packaging and Industrial Polymers representative.

Read and Understand the Material Safety Data Sheet (MSDS) before using this product

Regional Centres

DuPont operates in more than 70 countries. For help finding a local representative, please contact one of the following regional customer contact centers:
