The European Chemicals Agency (ECHA) added additional substances to the Candidate List of Substances of Very High Concern (SVHC) on January 17th, 2022.
The full list can be found here: <https://echa.europa.eu/candidate-list-table>.

In response to your inquiry, we have reviewed our available information regarding the presence of those substances in the products you purchase. Please find the relevant information in the attachment.

Please assess any legal obligations you may have to communicate the presence of SVHC substances in your products, depending on the type of product that you manufacture. You can read more on requirements for articles on the ECHA website: <https://echa.europa.eu/regulations/reach/candidate-list-substances-in-articles>.

DuPont is in the process of updating its Safety Data Sheets (SDSs) for products which contain >0.1% of SVHC and will send them to customers as soon as they are available.

These numbers reflect measurements performed recently on the materials / similar materials or estimate values based on process knowledge. They do not represent sales specifications nor do they imply any guarantee and/or warranty.

The above product does not contain any of the Substances of Very High Concern listed in the REACH 'Candidate List' (published in accordance with Article 59(10) of the REACH Regulation) as amended as per revision date of the letter.

The above product does not contain any of the substances subject to authorization as listed on the Annex XIV of Regulation (EC) N° 1907/2006 as amended as per revision date of the letter.

Crastin® SK641FR NC010
