General advice	: Remove from exposure, lie down. Never give anything by mouth to an unconscious person.
If inhaled	: If inhaled, remove to fresh air. Call a physician. If not breathing, give artificial respiration.
In case of skin contact	: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash contaminated clothing before reuse. Cool skin rapidly with cold water after contact with molten material. Do not attempt to remove material from the skin. Obtain medical treatment for thermal burn.
In case of eye contact	: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.
If swallowed	: Not a probable route of exposure. However, in case of accidental ingestion, call a physician.
Most important symptoms and effects, both acute and delayed	: None known.
Notes to physician	: Treat symptomatically

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	: Water Foam Dry chemical Carbon dioxide (CO ₂)
Specific hazards during fire fighting	: Combustible Large molten masses may ignite spontaneously in air. Water quenching is good practice.
Hazardous combustion products	: Hazardous combustion products may include: (see also section 10)

7. HANDLING AND STORAGE

Handling

Advice on safe handling : When opening containers, avoid breathing vapours that may be emanating.
Open container only in well-ventilated area.
Do not breathe vapours or fumes that may be evolved during processing.
Before using, read the product bulletin.

Avoidance of contact : Strong acids
and
Oxidizing agents

Storage

Conditions for safe storage : Keep containers tightly closed in a cool, well-ventilated place.
Keep container closed to prevent contamination.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Ingredients with workplace control parameters

Engineering measures : When hot processing this material, use local and/or general exhaust ventilation to maintain the concentration of vapors and fumes below exposure limits.
Local exhaust ventilation is preferred.
See Bulletin "Proper Use of Local Exhaust Ventilation During Processing of Plastics".
Use sufficient ventilation to keep employee exposure below recommended limits.

Personal protective equipment

Respiratory protection : A respiratory protection program that meets country requirements must be followed whenever workplace conditions warrant respirator use.
Consult the respirator manufacturer to determine the appropriate type of equipment for a given application. Observe respirator use limitations specified by the manufacturer.

Eye/face protection : Wear safety glasses with side shields.
Wear tightly fitting chemical splash goggles and face shield when possibility exists for eye and face contact due to splattering or splashing of molten material.

Skin and body protection : Where there is potential for skin contact, have available and wear as appropriate, impervious gloves, apron, pants, jacket, hood and boots.
If there is a potential for contact with hot/molten material wear heat resistant clothing and footwear.

Hand protection
Material : Protective gloves
