- Call a physician.
- In case of skin contact : The material is not likely to be hazardous by skin contact, but cleaning the skin after use is advisable.
Cool skin rapidly with cold water after contact with molten material.
Do not peel polymer from the skin.
Obtain medical treatment for thermal burn.
- In case of eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes.
Call a physician.
- If swallowed : No specific intervention is indicated.
Consult a physician if necessary.

-

SECTION 5. FIREFIGHTING MEASURES

- Suitable extinguishing media : Water
Foam
Dry chemical
Carbon dioxide (CO₂)
- Specific hazards during firefighting : Combustible
Large molten masses may ignite spontaneously in air.
Water quenching is good practice.
Minimize the generation and accumulation of dust.
Material in pellet form may accumulate static charge when poured from one container to another.
Failure or malfunction of temperature control systems on processing equipment, such as extruders, may create explosion hazards.
- Hazardous combustion products : Hazardous combustion products may include:
Carbon monoxide
carbon dioxide
(see also section 10)
- Further information : Evacuate personnel and keep upwind of fire.
- Special protective equipment for firefighters : Wear self-contained breathing apparatus and protective suit.

| 2.0 | 07-09-2024 | 000000058085 | Date of first issue: 07-09-2024 |

Methods and materials for containment and cleaning up : Spills of fine material should be cleaned using gentle sweeping or vacuuming. Cleaning methods (e.g. compressed air) which can generate potentially combustible dust clouds should not be used.
Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.
Use only non-sparking tools.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling : Open container only in well-ventilated area.
Wash hands thoroughly after handling.
Provide appropriate exhaust ventilation at dryers, machinery and at places where dust or volatiles can be generated.
Do not breathe dust.
Minimize the generation and accumulation of dust.
Pneumatic conveying and other mechanical handling operations can generate combustible dust.
Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.

Conditions for safe storage : Store in a cool, dry place.
Keep container closed to prevent contamination.
Keep in an area equipped with sprinklers.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Components with workplace control parameters**

This product does not contain any exposure limits that require disclosure according to OSHA Hazard Communication Standard 2012.

Engineering measures : General mechanical ventilation is normally adequate but use local exhaust where necessary to maintain exposures below acceptable limits.
Use local exhaust to completely remove vapors and fumes liberated during hot processing from the work area.

Personal protective equipment

Respiratory protection : Additives in this product do not present a respiration hazard unless the product is ground to a powder of respirable size and the dust is inhaled. All dusts are potentially injurious to the respiratory tract if respirable particles are generated and inhaled.
A respiratory protection program that meets country requirements must be followed whenever workplace conditions warrant respirator use.
Consult the respirator manufacturer to determine the appropriate type of equipment for a given application.
Observe respirator use limitations specified by the manufacturer.
Use a positive pressure air supplied respirator if exposure levels are not known or there are any other circumstances where air purifying respirators may not provide adequate protection.

Consult the OSHA respiratory protection information located at 29CFR 1910.134.

Hand protection

Remarks : Wear leather or cotton gloves when grinding, sawing, routing, drilling or sanding. When handling hot material, use heat resistant gloves.

Eye protection : Wear safety glasses with side shields.
Wear tightly fitting chemical splash goggles and face shield when possibility exists for eye and face contact due to spattering or splashing of molten material.
A full-face mask respirator provides protection from eye irritation.

Skin and body protection : If there is a potential for contact with hot/molten material wear heat resistant clothing and footwear.
