

Ravago

Manufacturing Division
Europe

Ravago Introduction

The Ravago Group with all its subsidiaries is a leading international supplier of Plastics and Rubbers to customers and end users in almost every corner of the world.

In 1961, long before plastics recycling became fashionable, Ravago pioneered the reprocessing of industrial plastic waste and its conversion into a new raw material source. In subsequent years, Ravago diversified and added the fast growing activities of plastics resale, branded distribution, and compounding.

Ravago SA is the parent company and main shareholder of more than 200 companies, active in the compounding, distribution, recycling and resale of plastic and rubber materials. Today, with more than 45 years of market pres-

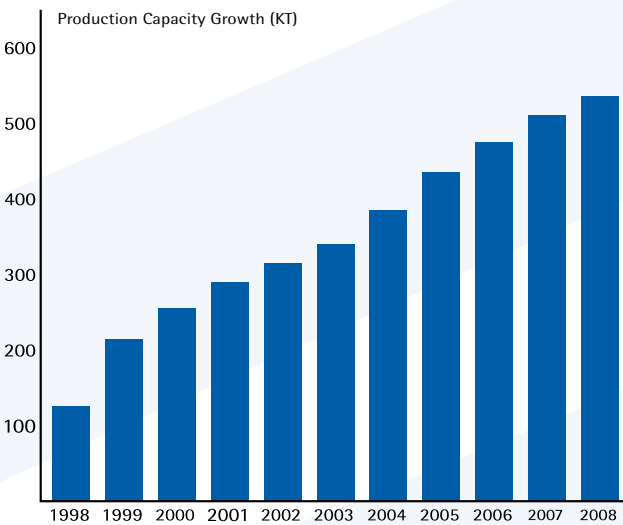

ence, over 4000 employees, and a global turnover of nearly 5 Billion €, Ravago ranks as one of Europe's oldest and most prominent plastics enterprises.

Throughout the years, the basic philosophy of Ravago SA has remained the same: To offer a premier service to the petrochemical, plastics and rubber conversion industry.

Ravago Manufacturing Division

Excellence in thermoplastics and rubber compounding and recycling.

The Ravago Group has more than 45 years of experience in recycling and compounding, and is a recognised global leader in these industries.

Our network of strategically located plants include 17 in Europe and Turkey and 5 in the U.S. A total annual capacity of more than 500 KT allows us to provide an excellent service to the whole industry. The Ravago Group produces high quality industrial and prime compounds based on all thermoplastics with an increased focus on engineering polymers: ABS, PC, PA, TPE-S, TPE-V and long glass fibre thermoplastic compounds.

Significant and ongoing investment helps to guarantee consistent quality, cost effective and technically proficient production. Professionally trained and experienced staff and well equipped laboratories ensure the analytical, rheological and mechanical consistency of the materials manufactured.

Toll Compounding

The Ravago Group has for over 30 years offered complementary Toll Compounding services to the Petrochemical Industry and the Plastic Converters. The Ravago Group is able to produce a variety of different compounds using state of the art plants, all equipped with the most modern equipment. We offer both extrusion and micronisation facilities to our customers. Flexibility, quality, service, confidentiality and reliability are the key-words of this service.

Own Products

The Ravago Group offers a wide range of proprietary Manufactured Products, covering the whole quality spectrum: Recycled Grades, Industrial Compounds and Prime Compounds. In close collaboration with our customers we can develop tailor made products that match with their special requirements or colours. We also assist our customers to look for cost-efficient solutions for their applications using our broad portfolio.

Quality

All compounding sites are ISO 9001/2000 certified and those supplying to the automotive industry are ISO TS 16949 approved. This quality assurance program covers all activities from administration, logistics, production and quality control. Total quality assurance is top priority in all compounding sites.

Ravago Brands

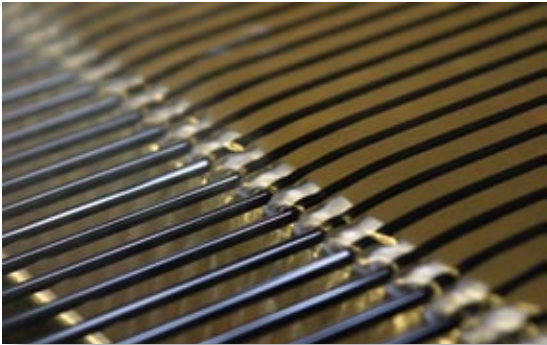

-  Ravalene® PE
-  Scolefin® / Mafill® PP
-  Sicostirolo® PS
-  Sicoran® SAN
-  Sicoflex® ABS
-  Polyfast® ASA
-  Mablex® PC/ABS
-  Sicoklar® PC
-  Sicoblend® PA/ABS
-  Sicoter® PPO/PBT
-  Ravamid® PA
-  Enflex® TPE-V
-  Ensoft® TPE-S
-  Factor® / Pryltex® LFT COMPOUNDS
-  Ravaflex® RUBBERS
