

Polypropylene

Daplen™ EF155AE

Polypropylene TPO Compound

Description

Daplen EF155AE is a 10% mineral filled elastomer modified polypropylene compound intended for injection moulding.

This material has an excellent balance between impact strength and stiffness and gives a good surface quality.

Applications

Daplen EF155AE has been developed especially for the car industry to be used in automotive exterior parts.

Bumpers

Exterior trims

Special Features

High flowability allowing to mould complex-structured parts with very high "flow path / wall thickness ratios"

Physical Properties

Values determined on standard injection moulded specimens conditioned at 23°C and 50% relative humidity after at least 96 hours storage time.

Property	Typical Value	Test Method
	Data should not be used for specification work	
Density	950 kg/m ³	ISO 1183
Melt Flow Rate (230 °C/2,16 kg)	18 g/10min	ISO 1133
Flexural Modulus (2 mm/min)	1.400 MPa	ISO 178
Tensile Strength (50 mm/min)	18 MPa	ISO 527-2
Heat Deflection Temperature B (0,45 MPa)	90 °C	ISO 75-2
Coefficient of Thermal Expansion (-30 °C/80 °C)	74 µm/mK	Borealis Method
Charpy Impact Strength, notched (23 °C)	35 kJ/m ²	ISO 179/1eA
Charpy Impact Strength, notched (-20 °C)	5 kJ/m ²	ISO 179/1eA

Processing Techniques

The actual conditions will depend on the type of equipment used.

This product is easy to process with standard injection moulding machines. To avoid residual humidity from transport or storage, the material should be pre-dried approximately 2h at 80°C. Following parameters should be used as guidelines:

Feeding temperature	40 - 80 °C
Mass temperature	220 - 260 °C
Back pressure	Low to medium
Holding pressure	30 - 60 bar
Mould temperature	30 - 50 °C
Screw speed	Low to medium

Daplen EF155AE

Flow front speed

100 - 200 mm/s

Storage

Daplen EF155AE should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

Safety

The product is not classified as dangerous.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety of the product. For more information, contact your Borealis representative.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of recovery and disposal of the product.

Regional Availability

Europe

North America: grade available under the name Daplen EF155AEU

For information on regional availability please contact Borealis Sales Representative.
