

Xencor™ HPPA LGF-4050

high performance polyamide

Xencor™ HPPA LGF-4050 is a 50% Long Glass Fiber reinforced, easy-flowing, heat stabilized HPPA with a very high flexural modulus. It exhibits unique stiffness/toughness combination, an excellent retention of properties in a wide temperature range as well as outstanding creep and fatigue resistance.

Xencor™ HPPA LGF-4050 has a pellet length of 9mm and can be processed on most injection-molding machines. It is available in black.

Black: Xencor™ HPPA LGF-4050 BK 000-9

Injection Notes

Pre-Drying -- Since polyamides are hygroscopic materials as well as sensitive to moisture during processing, this product should always be pre-dried. Recommended drying time is 4 hours at 120°C in dry-air dryer.

Regrind -- Regrind of highly filled thermoplastic materials, such as this material, should only be recycled with special care. The regrind content must never exceed 20% and only regrind of optimum quality should be used. In any case, part properties should be checked.
