PLEXIGLAS® PERFEXION™ Acrylic Sheet (also available in Non-Glare)

The PLEXIGLAS® PERFEXION™ Family of Specialty Acrylics for Framing

Trinseo provides framers, museums and galleries with a complete line of PLEXIGLAS® PERFEXION™ acrylic sheet products. Here's why they trust their work and works of art to the best-known name in acrylic sheet.

PLEXIGLAS® PERFEXION™ acrylic sheet rivals the finest optical glass for transparency, with light transmission qualities suitable for framing. It's 17 times stronger than glass and more than 50% lighter, too. This lowers shipping costs and reduces breakage in transit.

PLEXIGLAS® PERFEXION™ acrylic sheet is available in a non-glare surface.

The more you look at PLEXIGLAS® PERFEXION™ acrylic sheet, the more you see why it's the name framers think of first for clarity, protection, and artistic expression.

The Right Size for Every Framing Need (Standard Sizes and Quantities)

	Sheet Size	0.080"	0.098"	0.118"	0.177"	0.236"
