Subject: RoHS II Compliance

Dear Valued Customer:

In response to your request, we wish to provide the following information concerning INEOS ABS (USA) products carrying the Lustran, Guardian and Triax brand names:

Polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) – including DecaBDE, lead, cadmium, mercury and hexavalent chromium are not intentionally introduced into this product. We would not expect the total incidental concentration of any of these restricted substances to exceed 0.1% (1000 ppm), {0.01% (100 ppm) for cadmium}. Therefore, the subject product(s) comply with the requirements of Directive 2002/95/EC, 2003/11/EC and 2011/65/EU (also known as RoHS).

“Intentionally introduced” shall mean “deliberately utilized in the formulation of a material or component where its continued presence is desired in the final product to provide a specific characteristic, appearance, or quality.”

Thank you for your interest in the safe use and handling of INEOS ABS (USA) products. If we may be of any additional assistance, please do not hesitate to contact us.

Sincerely,

Jennifer C. Barry
Quality/Product Engineer
