

**STYROLUTION**

## SAFETY DATA SHEET

**Absolac®**

Material number ABC001

Revision date: 11/6/2015

Version: 8

Language: en-UN

Date of print: 25/6/2015

Page: 1 of 8

### 1. Identification of the substance/mixture and of the company/undertaking

#### Product identifier

Trade name: Absolac®  
This safety data sheet pertains to the following products:  
Absolac® (ALL GRADE)

#### Relevant identified uses of the substance or mixture and uses advised against

General use: Polymer  
Basic material for chemical industry processing

#### Details of the supplier of the safety data sheet

Company name: Styrolution ABS (India) Limited  
Street/POB-No.: 6th Floor, ABS Towers  
Old Padra Road  
Postal Code, city: 390 007 Vadodara, IN  
India  
WWW: www.styrolution.com  
E-mail: infopoint.asia@styrolution.com  
Telephone: +91 265-2355861-3, 2355871-3  
Dept. responsible for information:  
Infopoint, Telephone: + 65 (0) 6933 - 8372  
E-mail: infopoint.asia@styrolution.com

#### Emergency telephone number

Telephone: + 65 (0) 3158 1198

### 2. Hazards identification

#### Classification of the substance or mixture

##### GHS classification

This substance is classified as not hazardous.

#### Label elements

Hazard statements: not applicable

Precautionary statements: not applicable

#### Other hazards

Dust: Can cause skin, eye and respiratory tract irritation.  
In case of dust formation (Fine dust): danger of dust explosion  
The melted product can cause severe burns.  
Swallowing may cause gastrointestinal irritation and pain of guts.

### 3. Composition / information on ingredients

#### Substances

Chemical characterisation:  $(C_8H_8^*C_4H_6^*(C_3H_3)_n)_m$   
Styrene-acrylonitrile-butadiene copolymer  
Residual  
Styrene maximum: 2000 ppm  
Acrylonitrile maximum: 50 ppm  
CAS-Number: 9003-56-9  
Additional information: Preparation does not contain dangerous substances above limits that need to be mentioned in this section according to applicable legislation.

### 4. First aid measures

General information: Immediately remove any contaminated clothing, shoes or stockings.  
In case of inhalation: In case of inhalation of decomposition products, affected person should be moved into fresh air and kept still. In case of breathing stop use artificial aspiration immediately. seek medical attention  
Following skin contact: The melted product can cause severe burns.  
Do not remove the product from the skin without medical assistance.  
After contact with molten product, cool skin area rapidly with cold water. Cover with sterile dressing material to protect against infection. Consult physician.  
After eye contact: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
In case of troubles or persistent symptoms, consult an ophthalmologist.  
After swallowing: Rinse mouth with water. Drink one or two glasses of water.  
Never give an unconscious person anything through the mouth. seek medical attention

#### Most important symptoms and effects, both acute and delayed

Dust: Skin irritation, eye irritations and redness

#### Indication of any immediate medical attention and special treatment needed

Treat symptomatically.  
Decontamination, vital functions

### 5. Firefighting measures

#### Extinguishing media

Suitable extinguishing media:  
Water fog, foam, extinguishing powder, carbon dioxide (CO<sub>2</sub>).  
Extinguishing media which must not be used for safety reasons:  
Full water jet

#### Special hazards arising from the substance or mixture

In case of fire may be liberated: smoke, carbon monoxide and carbon dioxide (CO<sub>2</sub>).  
Possible in traces: acrylonitrile, butadiene, styrene, hydrocarbons, aldehydes, acids, hydrogen cyanide.  
In case of dust formation (Fine dust): danger of dust explosion

## Advice for firefighters

Special protective equipment for firefighters:

Wear a self-contained breathing apparatus and chemical protective clothing.

Additional information: Seal off endangered area. Remove persons to safety. Do not allow fire water to penetrate into surface or ground water. Fire residuals and contaminated extinguishing water must be disposed of in accordance with the regulations of the local authorities.

## 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

Keep the molten mass away from the eyes and the skin.

Where there is a risk of exothermal decomposition as a result of overheating (rise in temperature, formation of fumes or smoke) cool the melt in a water bath.

Provide adequate ventilation.

Wear personal protection equipment. Do not breathe dust.

### Environmental precautions

Do not allow to penetrate into soil, waterbodies or drains.

### Methods and material for containment and cleaning up

Take up mechanically. Collect in closed containers for disposal.

Avoid generation of dust. Remove all sources of ignition. Provide adequate ventilation.

Additional information: Special danger of slipping by leaking/spilling product.

## 7. Handling and storage

### Precautions for safe handling

Advices on safe handling: For mechanical processing: Provide adequate ventilation, and local exhaust as needed.

Do not breathe dust.

In the case of the formation of dust: Withdraw by suction.

In case of melting: To avoid thermal decomposition, do not overheat.

Make sure there is sufficient air exchange and / or that working rooms are air suctioned.

Avoid exceeding WEL threshold levels. Do not breathe vapours.

Molten material: Avoid contact with the substance.

After work, wash hands and face.

Precautions against fire and explosion:

Take precautionary measures against static discharges. Keep away from sources of ignition. Use grounding equipment. Use explosion-proof equipment and non-sparking tools/utensils. Avoid open flames.

In case of dust formation (fine dust): danger of dust explosion

### Storage

Requirements for storerooms and containers:

Store in a well-ventilated place. Keep container tightly closed. Store only in original container.

Protect against heat /sun rays.

Protect from moisture contamination.

Further details: Special danger of slipping by leaking/spilling product.

## 8. Exposure controls/personal protection

### Control parameters

Occupational exposure limit values:

| CAS No.   | Designation | Type             | Limit value                    |
|-----------|-------------|------------------|--------------------------------|
| 9003-56-9 | Absolac®    | USA: ACGIH: TWA  | 10 mg/m <sup>3</sup>           |
|           |             | USA: ACGIH: TWA  | 3 mg/m <sup>3</sup>            |
| 100-42-5  | Styrene     | USA: ACGIH: STEL | 170 mg/m <sup>3</sup> ; 40 ppm |
|           |             | USA: ACGIH: TWA  | 85 mg/m <sup>3</sup> ; 20 ppm  |

### Exposure controls

Provide good ventilation in the work area. Additional controls are not normally necessary when handling the polymer.

Thermal extrusion: Provide local exhaust ventilation to ensure that the workplace exposure limit is not exceeded.

Use of respiratory protection may be necessary during maintenance activities.

See also information in chapter 7, section storage.

### Personal protection equipment

#### Occupational exposure controls

**Respiratory protection:** Respiratory protection must be worn whenever the WEL levels have been exceeded. Use filter type A-P2 according to EN 14387.

**Hand protection:** Protective gloves according to EN 374.  
 Glove material: Nitrile rubber - Layer thickness. 0.11 mm.  
 Breakthrough time: >480 min.  
 Observe glove manufacturer's instructions concerning penetrability and breakthrough time.  
 In case of melting: Impervious heat protective gloves according to EN 407.  
 Glove material: Leather  
 Observe glove manufacturer's instructions concerning penetrability and breakthrough time.

**Eye protection:** Tightly sealed goggles according to EN 166.

**Body protection:** Wear suitable protective clothing. Boots or safety shoes.  
 In case of dust formation: Overall

**General protection and hygiene measures:**  
 Molten material: Avoid contact with skin.  
 Avoid breathing dust and vapours. Keep away from sources of ignition.  
 Wash hands before breaks and after work.  
 In case of dust formation: Particular danger of slipping on spilled product on the ground.

## 9. Physical and chemical properties

### Information on basic physical and chemical properties

**Appearance:** Form: solid, pellets  
 Colour: colourless / varying, depends on colouring

**Odour:** weak, characteristic

**Odour threshold:** no data available

**pH value:** no data available

# SAFETY DATA SHEET

|                                          |                                     |
|------------------------------------------|-------------------------------------|
| Melting point/freezing point:            | approx. 90 °C                       |
| Initial boiling point and boiling range: | no data available                   |
| Flash point/flash point range:           | no data available                   |
| Evaporation rate:                        | no data available                   |
| Flammability:                            | Not highly flammable.               |
| Explosion limits:                        | no data available                   |
| Vapour pressure:                         | no data available                   |
| Vapour density:                          | no data available                   |
| Density:                                 | at 20 °C: 1 - 1.1 g/cm <sup>3</sup> |
| Water solubility:                        | insoluble                           |
| Partition coefficient: n-octanol/water:  | no data available                   |
| Auto-ignition temperature:               | not self-igniting                   |
| Thermal decomposition:                   | approx. > 300 °C                    |

## Additional information

|                       |                                  |
|-----------------------|----------------------------------|
| Viscosity             | -                                |
| Explosive properties: | Dust explosion risk at fine dust |
| Ignition temperature: | > 400 °C                         |
| Bulk density:         | 500 - 700 kg/m <sup>3</sup>      |

## 10. Stability and reactivity

|                                     |                                                                                                                                                                                                             |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity:                         | exothermic reactions                                                                                                                                                                                        |
| Chemical stability:                 | Stable under recommended storage conditions.                                                                                                                                                                |
| Possibility of hazardous reactions: | In case of dust formation (Fine dust): danger of dust explosion                                                                                                                                             |
| Conditions to avoid:                | Keep away from sources of ignition and heat. Keep away from open flames, hot surfaces and sources of ignition.<br>Avoid dust formation. Protect from moisture contamination.                                |
| Incompatible materials:             | Strong oxidizing agents, strong acids                                                                                                                                                                       |
| Hazardous decomposition products:   | In case of fire may be liberated: smoke, carbon monoxide and carbon dioxide (CO <sub>2</sub> ).<br>Possible in traces: acrylonitrile, butadiene, styrene, hydrocarbons, aldehydes, acids, hydrogen cyanide. |
| Thermal decomposition:              | approx. > 300 °C                                                                                                                                                                                            |

## 11. Toxicological information

### Information on toxicological effects

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The chemical structure of the polymer does not suggest a specific alert for such an effect.</p> <p>Effects on or via lactation: Lack of data.</p> <p>Specific target organ toxicity (single exposure): Lack of data.</p> <p>Dust: Can cause skin, eye and respiratory tract irritation.</p> <p>Processing, thermal hazards: Vapours: Can cause skin, eye and respiratory tract irritation.</p> <p>Specific target organ toxicity (repeated exposure): Lack of data. Chronic toxic effects are not expected. The product has not been tested. The statement is derived from products of similar structure or composition.</p> <p>Aspiration hazard: Lack of data.</p> |
| Other information:     | When handled appropriately, even after long years of experience with this product, no adverse health effects are known.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

### Symptoms

Dust: Can cause skin, eye and respiratory tract irritation.

The melted product can cause severe burns.

Thermal treatment, Processing:

Irritating to eyes, respiratory system and skin.

In case of ingestion: Swallowing may cause gastrointestinal irritation and pain of guts.

## 12. Ecological information

### Toxicity

|                           |                                                              |
|---------------------------|--------------------------------------------------------------|
| Aquatic toxicity:         | no evidence of aquatic toxicity                              |
| Effects in sewage plants: | In sewage treatment plants it may be separated mechanically. |

### Persistence and degradability

Further details: Biodegradation: Product is not readily biodegradable.  
The product is likely to persist in the environment.

### Mobility in soil

no data available

### Additional ecological information

General information: Do not allow to enter into ground-water, surface water or drains.

## 13. Disposal considerations

### Waste treatment methods

#### Product

Recommendation: With due observance of the regulations laid down by the local authorities, this must be brought to a suitable incineration plant/waste disposal site.

#### Contaminated packaging

Recommendation: Dispose of waste according to applicable legislation.  
Non-contaminated packages may be recycled.

## 14. Transport information

### Sea transport (IMDG)

Proper shipping name: Not restricted  
Marine pollutant: No

### Air transport (IATA)

Proper shipping name: Not restricted

### Further information

No dangerous good in sense of these transport regulations.

## 15. Regulatory information

### National regulations - EC member states

EC-number: -

## 16. Other information

Reason of change: General revision (Regulation (EU) No 2015/830)  
Date of first version: 7/11/2012

### Department issuing data sheet

Contact person: see section 1: Dept. responsible for information

## SAFETY DATA SHEET

Revision date: 11/6/2015  
Version: 8  
Language: en-UN  
Date of print: 25/6/2015  
Page: 8 of 8

The information in this data sheet has been established to our best knowledge and was up-to-date at time of revision. It does not represent a guarantee for the properties of the product described in terms of the legal warranty regulations.
